Source: Ericsson and Arthur D. Little, The 5G Business Potential: Second Edition, October 2017

The Internet of Things offers a potential economic impact of \$4 trillion to \$11 trillion a year in 2025.

Nine settings where value may accrue	Size in 2025, \$ trillion ¹	
	Low estimate	High estimate
Factories —eg, operations management, predictive maintenance	1.2	3.7
Cities —eg, public safety and health, traffic control, resource management	0.9	1.7
Human —eg, monitoring and managing illness, improving wellness	0.2	1.6
Retail —eg, self-checkout, layout optimization, smart customer-relationship management	0.4	1.2
Outside —eg, logistics routing, autonomous (self-driving) vehicles, navigation	0.6	0.9
Work sites —eg, operations management, equipment maintenance, health and safety	0.2	0.9
Vehicles —eg, condition-based maintenance, reduced insurance	0.2	0.7
Homes —eg, energy management, safety and security, chore automation	0.2	0.3
Offices —eg, organizational redesign and worker monitoring, augmented reality for training	0.1	0.2
Total \$4 trillion–\$11 trillion		

¹Adjusted to 2015 dollars; for sized applications only; includes consumer surplus. Numbers do not sum to total, because of rounding.

CAMPUS NETWORK- BASICS OF INDUSTRY 4.0 ECOSYSTEM

Solution

- New standard and type of communication
- Campus Network is a crucial component of 5G use cases
- Unlimited data consumption
- Dedicated Radio – Core – IP resources for use-case
- QoS for service separation with Service Level Agreement

Goals

- Provide a low latency, high reliability and high speed network
- Helps for further service product specification
- Evaluate e2e integrated but QoS differentiated services

DIVERSE CONNECTIVITY REQUIREMENTS OF LOCAL INDUSTRIAL ECOSYSTEMS WILL BE FULFILLED IN „CAMPUS“ AREAS

📍 Factory Floor

📍 Warehouse

📍 Office

📍 Outdoor Intralogistics

📍 Utilities

📍 Security Infrastructure

STANDARD PUBLIC NETWORK COVERS PARTS OF AN INDUSTRY CAMPUS, MAINLY OUTDOOR COVERAGE

Warehouse

Office

Utilities

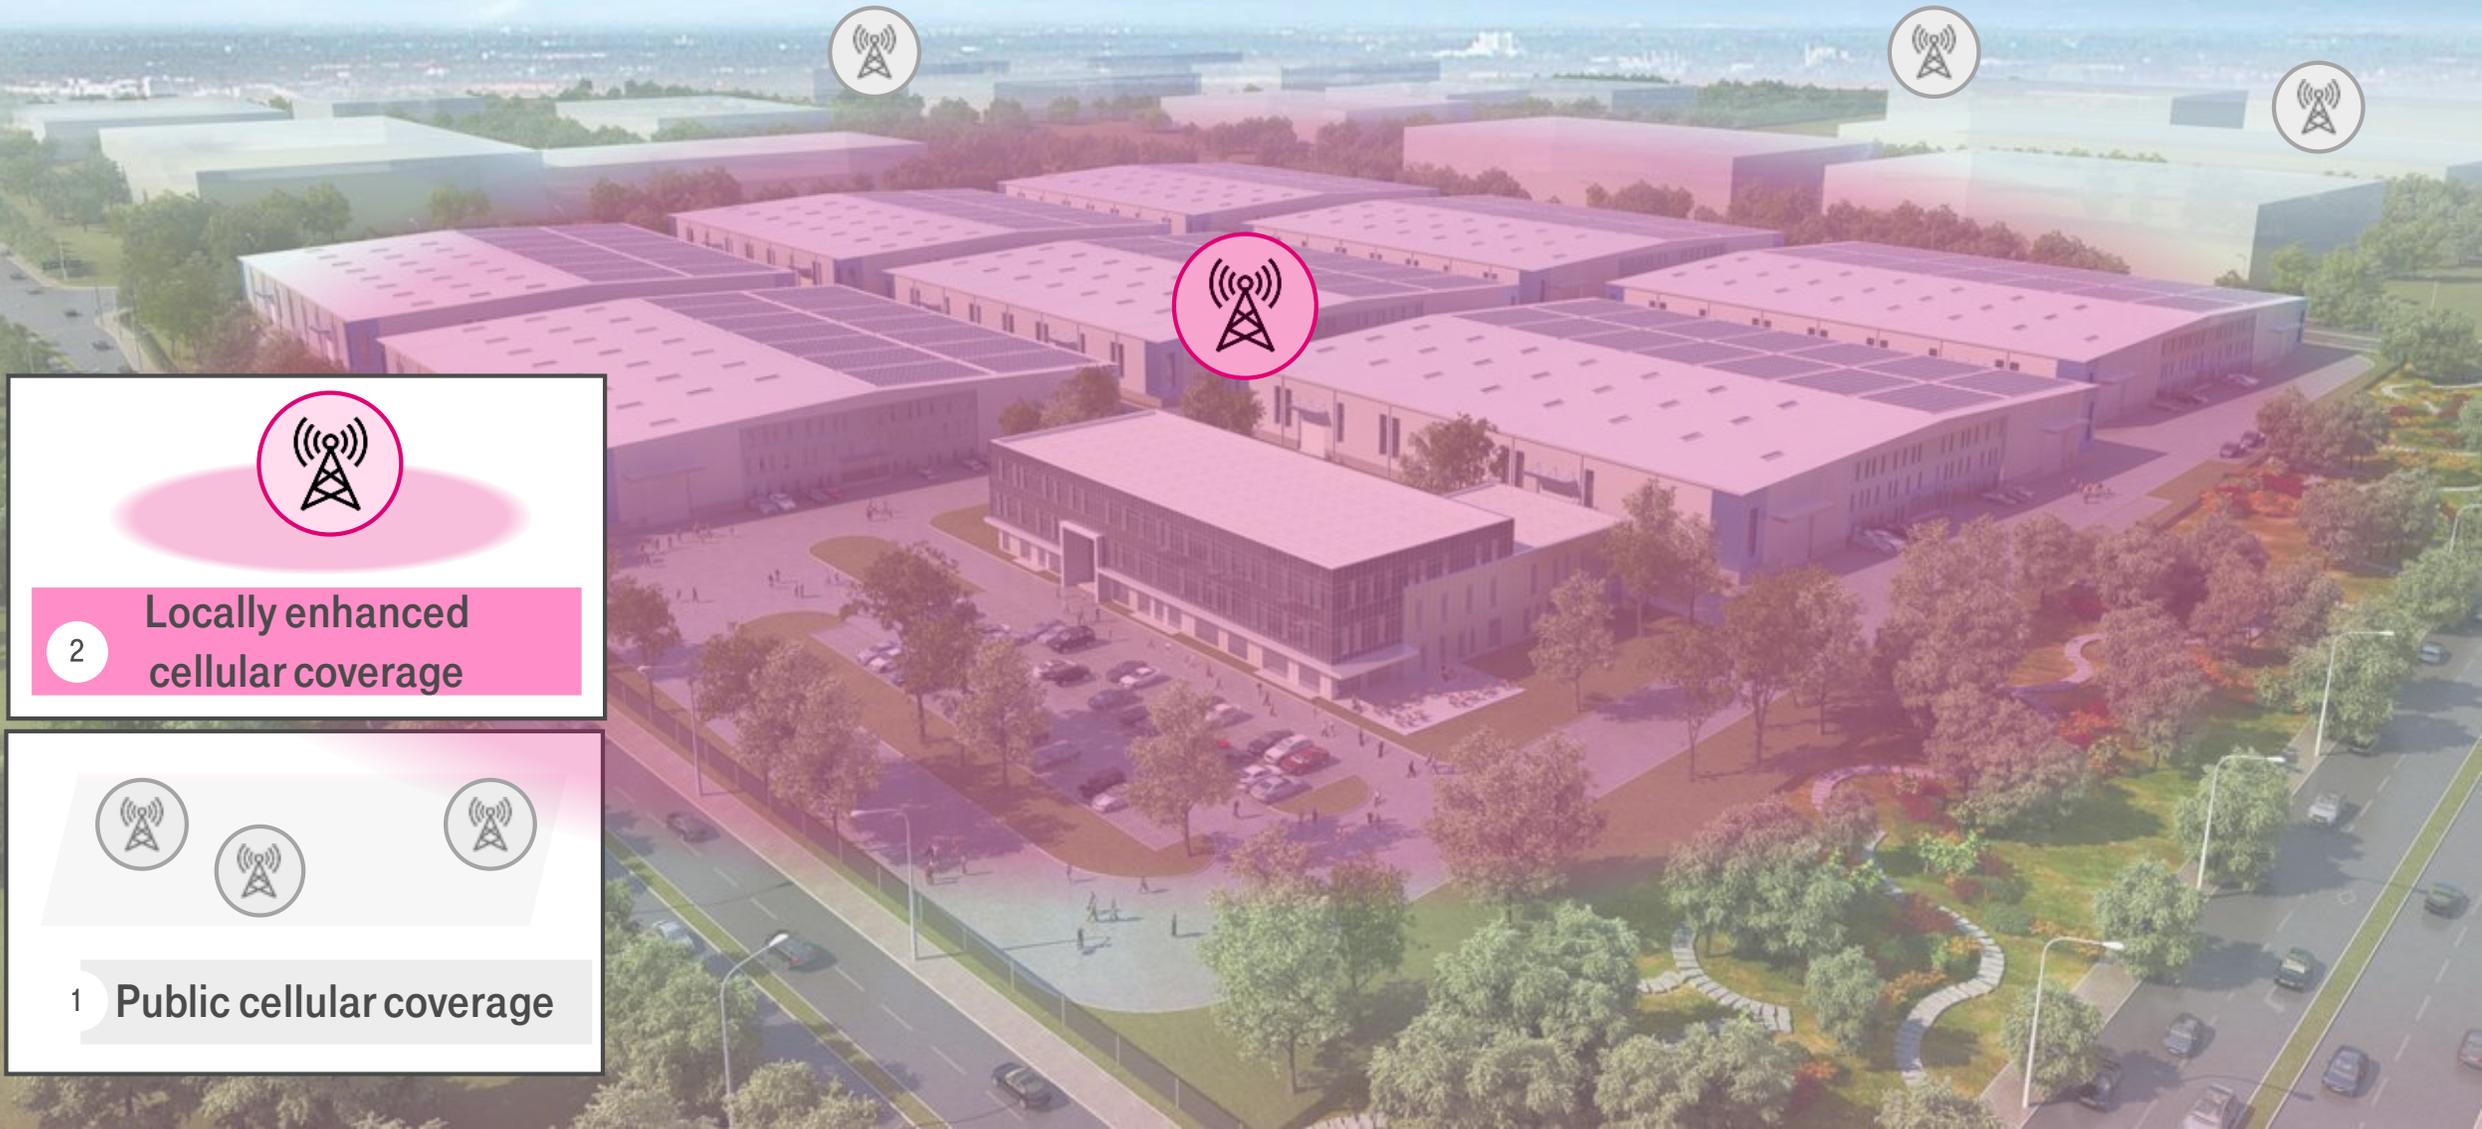

Security Infrastructure

Factory Floor

Outdoor Intralogistics

1 Public cellular coverage

ADDITIONAL ANTENNA FOR BETTER IN-HOUSE COVERAGE ON CAMPUS, MAINLY FOR SMARTPHONE USAGE

2

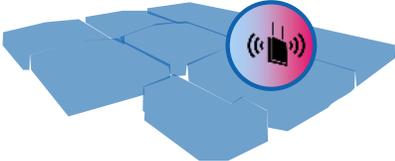

Locally enhanced cellular coverage

1

Public cellular coverage

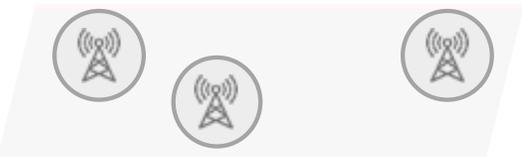

CAMPUS NETWORK FOR INDUSTRY 4.0 MEETS DEMANDS OF CONNECTING MACHINES VIA MOBILE NETWORK

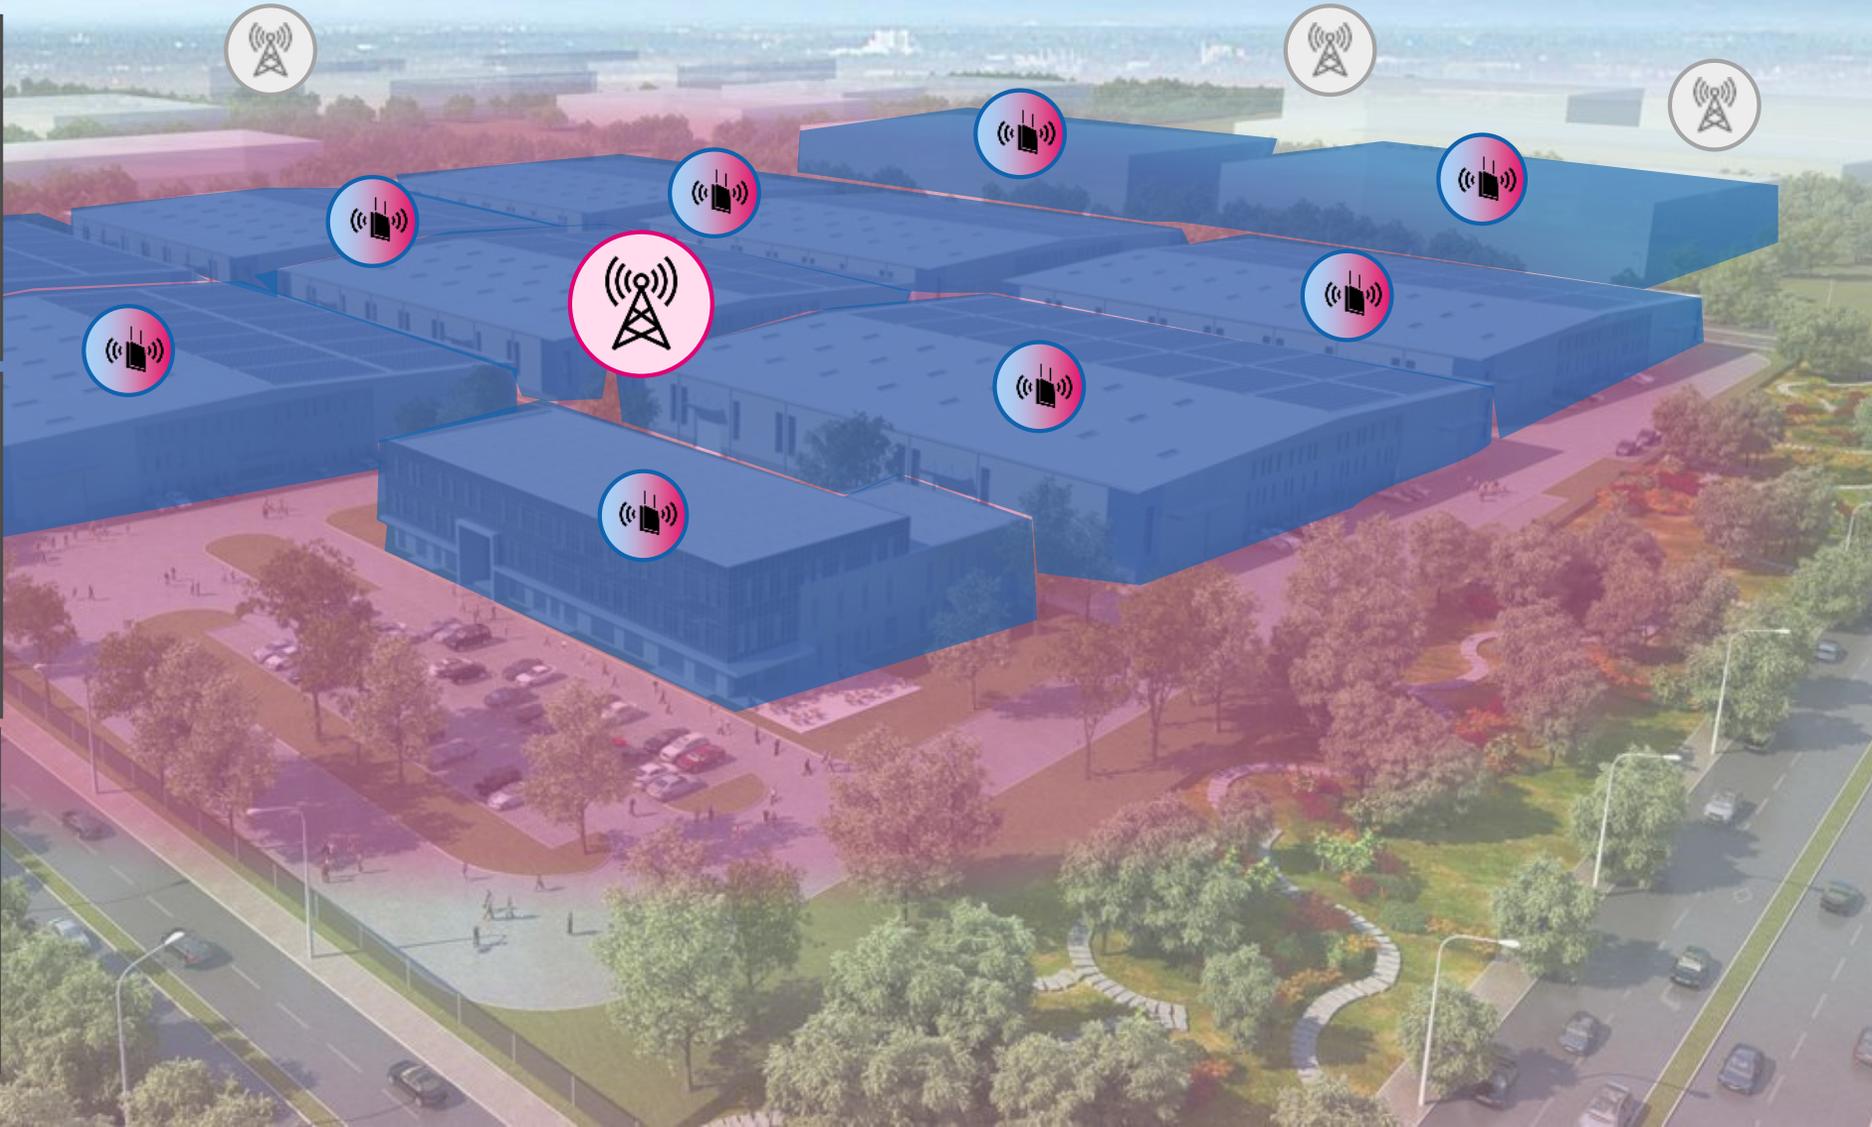

3 Dedicated private cellular coverage

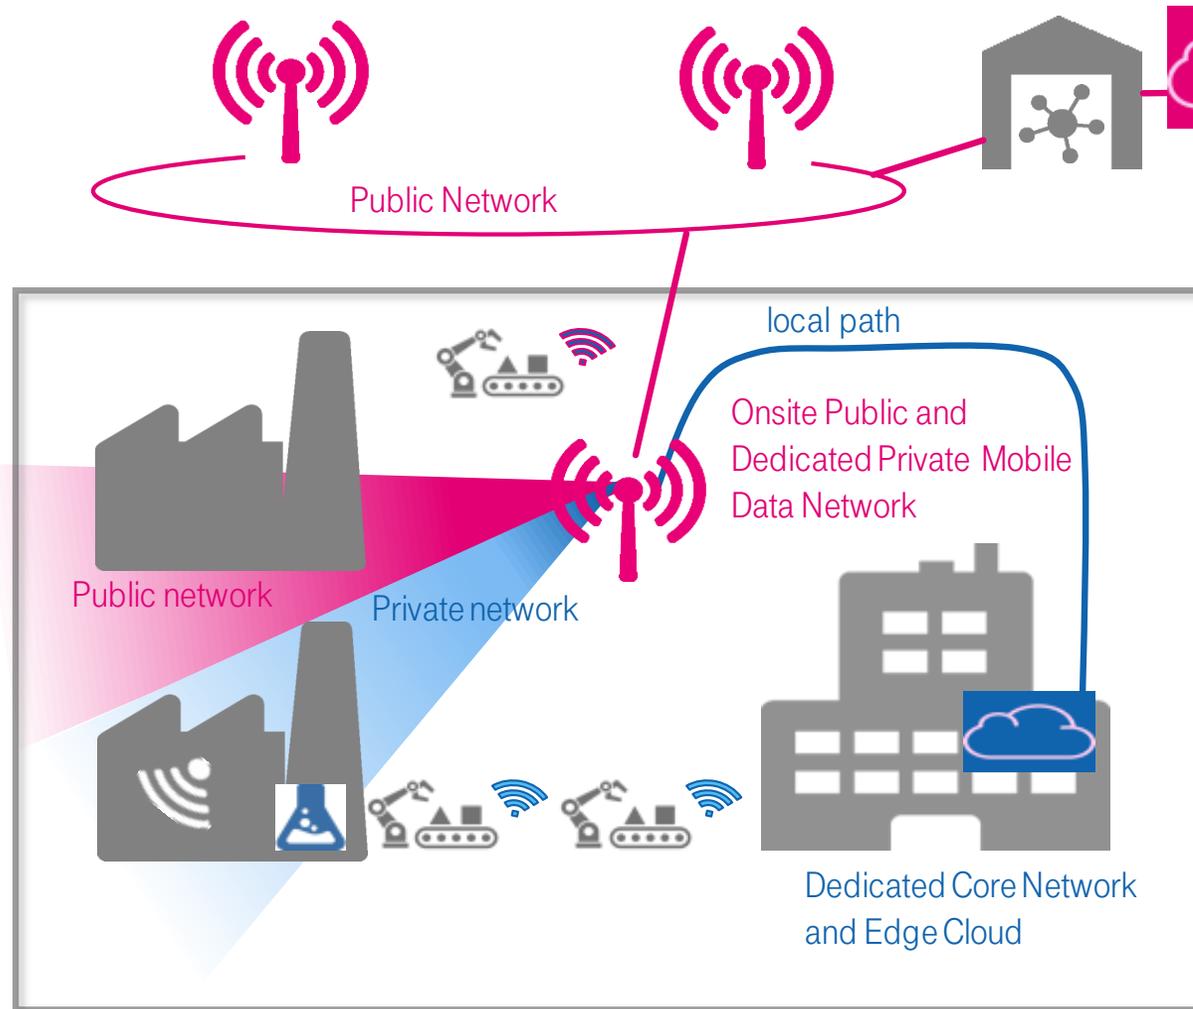

2 Locally enhanced cellular coverage

1 Public cellular coverage

TWO NETWORK LAYERS – PARTED BY DIFFERENT NETWORK IDS – DEDICATED ONSITE CORE NETWORK

- Dedicated RAN (Radio Access Network) for the Campus
- Combined radio layer with guaranteed resources and dedicated network ID (PLMN ID)
- Private Core Network to keep traffic local and achieve high customer autonomy in combination with edge cloud on campus
- Network-as-a-Service offering matches the customer demand and understanding of a private network
